

Dry Ice Manufactured Daily

Cryogenic Gases Dry Ice

Cryogenic Gases is the only manufacturer and distributor of dry ice in the state of Michigan

Dry ice is available for delivery or pick-up at our Detroit or Ann Arbor stores during our regular retail hours. From a 50 Lb. retail purchase to thousands of pounds of dry ice a week, Cryogenic Gases is able to meet any customer's needs. We offer customized dry ice packages and sizing depending on the application requirement.

Dry ice is the solid form of carbon dioxide, at -109.3°F , it offers a lower temperature than water ice, longer holding times and requires no clean-up. Due to these unique properties, it has a wide variety of uses.

Dry Ice for Commercial Use:

- Dry ice blasting
- Dry food production
- Laboratory, research and biomedical supply
- Food storage & distribution, gift shippers, street vending, home delivery
- Meat processing and distribution
- Airline catering
